Metric DIN 580 lifting eye bolts are threaded at one end and a loop at the other end. Commonly used in in rigging equipment for vertical or angled loading. Unique Fasteners offers the following sizes for immediate delivery from stock: Diameters ranging from M6 to M80.

DIN (**D**eutsches Institut für **N**ormung - German Institute for Standardization) standards are issued for a variety of components including industrial fasteners as metric DIN 580 lifting eye bolts. The DIN standards remain common in Germany, Europe and globally even though the transition to ISO standards is taking place. DIN standards continue to be used for parts which do not have ISO equivalents or for which there is no need for standardization.
