Metric DIN 6330 Hexagon Nuts are hex nuts that are thicker than standard metric hex nuts. DIN 6330 metric hex nuts have a height of 1.5 x the diameter. Also one of the faces is rounded matching DIN 6319 conical seats which in certain assemblies can compensate for uneven surfaces. Unique Fasteners offers the following sizes for immediate delivery from stock: Diameters ranging from M6 to M36 available in A2 and marine grade A4 stainless steel.

DIN (**D**eutsches **I**nstitut für **N**ormung - German Institute for Standardization) standards are issued for a variety of components including industrial fasteners as metric DIN 6330 Hexagon Nuts. The DIN standards remain common in Germany, Europe and globally even though the transition to ISO standards is taking place. DIN standards continue to be used for parts which do not have ISO equivalents or for which there is no need for standardization.
