All measurements are in mm

Metric DIN 84 is a slotted drive machine screw with a cheese head. Machine screws are externally threaded fasteners designed to be mated with threaded nuts or tapped holes in the parts they are designed to hold together. DIN 84 Slotted Cheese Head Machine Screws are fully threaded and can be used for many applications. UNIQUE Fasteners offers over 500,000 unique fastener products from stock in inch and metric standard in a variety of materials and finishes. The following sizes DIN 84 slotted cheese (pan) head machine screws are available for immediate shipping from stock: Diameters ranging from M1 to M10 and lengths up to 90mm long in steel and stainless steel A2 and A4.

DIN (**D**eutsches **I**nstitut für **N**ormung - German Institute for Standardization) standards are issued for a variety of components including industrial fasteners as Metric DIN 84 Slotted Cheese (Pan) Head Machine Screws. The DIN standards remain common in Germany, Europe and globally even though the transition to ISO standards is taking place. DIN standards continue to be used for parts which do not have ISO equivalents or for which there is no need for standardization. The ISO equivalent DIN 84 Slotted Cheese Head Machine Screws is ISO 1207.
