Metric DIN 929 hexagon weld nuts have three equally spaced welding projections for solid contact with the weld surface. The projections help to accommodate weld surfaces that may not be perfectly flat. It also features a precision pilot for accurate location and threading of mated components and protecting the threads from welding spatter.

Unique Fasteners offers one of the most complete ranges of metric nuts and other inch and metric industrial fasteners for immediate delivery from stock. The following sizes of DIN 929 hexagon weld nut are available for immediate shipping from stock: Diameters ranging from M3 to M16 in stainless steel A2.

DIN (**D**eutsches Institut für **N**ormung - German Institute for Standardization) standards are issued for a variety of components including industrial fasteners as Metric DIN 929 hexagon weld nuts. The DIN standards remain common in Germany, Europe and globally even though the transition to ISO standards is taking place. DIN standards continue to be used for parts which do not have ISO equivalents or for which there is no need for standardization.
